

The title

Your name

Supervisor: Dr. A Anon

Submitted in partial fulfilment of the requirements for the degree of BSc Creative Computing of the University of London.

Department of Computing Goldsmiths, University of London

I certify that this dissertation, and the research to which it refers, are the result of my own work.

Abstract

Aim for around 200-300 words to highlight the main points and contributions of your project.

Acknowledgements

List of abbreviations

XXX something

Introduction

- 1.1 Motivation
- 1.2 Aim
- 1.3 Thesis structure

Chapter 7

1.4 Contributions

Contributions of this thesis are:

• Blah

Background

- 2.1 Background
- 2.2 Literature review

Foo (2017) propose... The state of the art... (Foo 2017).

Specification and design

3.1 System design

Diagrams would be good here.

Implementation

4.1 System architecture

4.2 Software implementation

Only include code where it is essential to make a point, e.g. a clever optimisation trick you implemented. Do not copy and paste lots of boilerplate code in your report, refer to your git repository.

Listing 4.1: Example of typesetting code with listing. Keep code snippets short!

```
# Generate example data.
np.random.seed(13)
                                 # Seed the random number generator.
n=50
                                 # Number of observations.
happiness_levels = ['very sad', 'sad', 'neutral', 'happy',
                     'very happy']
happiness\_prob = [0.05, 0.2, 0.3, 0.35, 0.1]
s = pd. Series (np.random.choice (happiness_levels, n,
                                p=happiness_prob),
              name = 'happiness')
# Set correct data type.
s = s.astype(
    pd.api.types.CategoricalDtype(
        ordered=True,
        categories = happiness_levels))
# Compute percentages.
pc = s.value_counts(sort=False, normalize=True) * 100
# Plot.
ax = pc.plot.bar(rot=0)
ax.yaxis.set_major_formatter(
    mpl.ticker.PercentFormatter(decimals = 0))
```

```
ax.set_xlabel('happiness raitings')
plt.show()
```

Software testing

- 5.1 Unit testing
- 5.1.1 Results

Table 5.1: This is some example data

	id	a	b
	0	1	2
	1	3	4
to	otal	4	6

- 5.2 Load testing
- 5.2.1 Results

Evaluation

6.1 User testing

6.2 Results

Figure 6.1 shows...

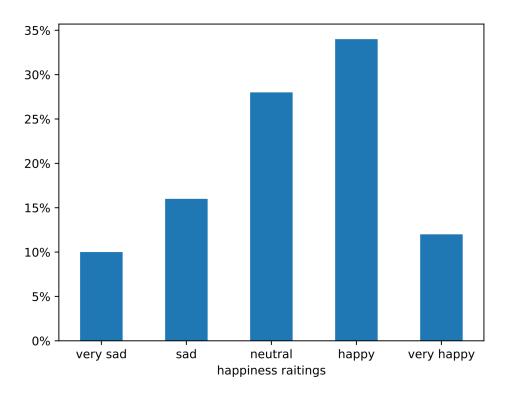

Figure 6.1: User ratings

Conclusions and further work

- 7.1 Summary of contributions
- 7.2 Further work
